Advice for firefighters

- . NDA
- . Structural firefighters' protective clothing will only provide limited protection. Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection. Wear positive pressure self-contained breathing apparatus (SCBA). Move containers from fire area if you can do it without risk. Use water spray to cool containers exposed to fire.

Section 6: Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions

- Wear appropriate protective equipment including respiratory protection as conditions warrant. Do not touch or walk through spilled material. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Emergency Procedures

- As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area) Keep out of low areas. Keep unauthorized personnel away. Stay upwind. Ventilate closed spaces before entering.

Environmental precautions

- . Avoid run off to waterways and sewers.

Methods and material for containment and cleaning up

Containment/Clean-up Measures

- . Small spills may be flushed down sewage drain using plenty of water to dilute. Large spills may be neutralized with soda ash and placed in suitable container for disposal.

Section 7: Handling and Storage

Precautions for safe handling

Handling

- Avoid damage to container in handling.

Conditions for safe storage, including any incompatibilities

Storage

- Store at room temperature. Keep from freezing.

Incompatible Materials or Ignition Sources

- . Keep away from heat, ignition sources oxidizers and strong acids.
